Project Undertaken in Capgemini

Secured Overnight Financing Rate(SOFR)

Duration	:	March 2021 - till now
Customer	:	Royal Bank of Canada(RBC)
Tools & Technologies	:	JAVA, Spring boot, Spring Data JPA, Restfull Webservices
Role	:	Java Developer
Project Theme	:	SOFR is Capital market where we are capturing the rates, calling the capital API's using Rest template and capturing in to flat file.

Description :

By giving URL in the code, used to hit the request and when it runs in the browser used to get the response. The obtained response rates made to store in the format of flat file. It consists of lookback logic for 5 days, based on holidays, weekends. If the logic hits the holiday or weekend it needs to skip(-1) to get the working day.

Roles & Responsibilities :

- Development of new product as per client requirement.
- Working on the Change Requests or fixing bugs.
- Performed regression and unit-level testing to verify software quality and function before it was released.
- Time to time Knowledge Transfer between application team for effective utilization.
- Done with the JUnit test and used exceptions.
- Tested the application related to holiday calendar.
- Added the constant variables based on the environment and tried to get the password from UCD □
Worked regarding failure scenario
- Failure scenario - when the application gets technical or server issues then it was automated to run for a particular time

Personal Project

- I have designed my portfolio website using front-end technologies like HTM, CSS. Javascript, JQuery. And I have hosted it on GitHub.

Co-curriculum Activities

- Organized a workshop on BIGDATA and HADOOP conducted by a Tech Cryptors in BVRITN.
